A dictionary is a collection of words ranging from letters A-Z. When reading or writing a story, an essay, a paragraph or even a sentence, using a dictionary is a great help.

There are many advantages of using a dictionary. So, using a dictionary is important for students. The first advantage of using a dictionary is pronunciation. We can also listen to the pronunciation of the words if we use an audio dictionary. The second advantage of using a dictionary is checking out a word's right spelling. The third advantage of using it is learning a word's part of speech. It is one of the types into which words are divided in grammar according to their use, such as noun, verb, or adjective.

Lastly, example sentences are mostly available. Seeing specific words used in a sentence can provide more context and help you better understand proper usage. However, searching words by using a dictionary takes a lot of time. By using a talking dictionary, we are able to look the words up in a few minutes.

As a result, a dictionary is a great help for everyone, especially students who are learning a language and who are interested in language learning.

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years.

Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different kinds of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.

Nowadays, solar energy can be converted into other forms of energy, such as heat and electricity. Solar energy might be used for heating water and air in homes, buildings, or swimming pools.

Maybe you've seen buildings or houses with big shiny panels on the roof. These solar collectors collect heat by absorbing sunlight. Solar energy is used in generating electricity for watches, highway signs, houses and even space stations.

Some people prefer to provide help and support directly to those in need. However, others prefer to give money to national and international charity organizations. Giving money to those in need can be personally good experience, but there is a choice between donating nationally and internationally through charities or giving directly to those around you.

One of the advantages of providing direct support is that you can know exactly how your money is spent. Another benefit is that you can see the impacts on those you are helping, which can lead not only to great personal happiness but also to respect from others who appreciate the work you do.

There are advantages in giving to charities that are national and international. First and the best is helping in problems of global importance, such as curing diseases and human rights or helping those who are in bad environmental events like earthquakes and floods.

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.

Experimental works are in progress to produce energy from other resources. Scientists and experts spared no pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, valued, and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.
