The modern lifestyle has had both positive and negative effects on people's lives.

Modern technologies have enabled us to have easy access to information, become more creative, experience fast communication, travel easier, and have a more comfortable life. Have you ever imagined a world without the Internet, tablets, mobile phones, airplanes, and vacuum cleaners? Most people cannot do that, as technology is the miracle of our time.

But using new technologies has changed people's lifestyle in a way that harms their lives in this century as well. Some technologies are dangerous to our health and can harm our body. Using mobile phones or surfing the net for long hours can increase people's blood pressure and cause sleep problems. Playing video games for long hours makes people nervous and harm their heart and nervous system. Listening to music by headsets can be harmful to one's hearing and even brain.

۵۴ True or False

- 1) Technology has had both negative and positive effects. (True / False)
- 2) Playing video games doesn't have any effect on our body. (True / False)

۵۵ Write two positive effects of modern Technologies?

۵۶ How can using mobile and surfing the net be harmful?

۵۷ What does make people nervous?

متن زیر را بخوانید و به ۴ سؤال بعدی پاسخ دهید.

Children shouldn't play video games. But why? First, children should be active, so playing outside is better than playing video games. Second, many video games are harmful and can have bad effects on children's behavior; however, not all video games are harmful to children. Third, time spent playing video games could be spent reading books or spending time with friends and family. In short, physical activities are better for children than playing video games.

Solar energy is the most effective of all energy resources and it can even be available in cloudy weather. The solar energy which comes to the Earth is about 10,000 times greater than the amount which humankind consumes. Solar technologies can deliver heat, cooling, natural lighting, electricity, and fuels. Solar technologies convert sunlight into electricity energy through solar panels or mirrors. Although not all countries use solar energy, it is possible for every country.

The cost of producing solar panels has surprisingly decreased in the last few years, making them not only in access but often the cheapest form of electricity. Depending on the type of material used in their production, solar panel can work for around 30 years.

A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying') There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also give more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. There are also dictionaries which translate words into other languages. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.

Many countries have used the energy in moving water for thousands of years. And today, It's still a powerful resource that can generate clean, and cheap electricity. They produce energy from running water and convert it to electricity. The power that is produced as a result of falling or running water is called "hydroelectric power" or "hydropower". Turbines and generators convert this power into electricity. Today, about 19% of all our electricity is generated from hydropower, making it one of the largest sources of renewable power. So what makes hydropower renewable? It's simple: water. Water is converted into clouds and recycles back to earth as rain. This process is called "The Water Cycle". The water cycle is continuously recharging and can be used to produce electricity along the way.
